REMOTE VIEWING SESSION DCC-89

TIME

#14: This will be a remote viewing session for 15 July 1981; mission time is 0900 hours.

0900

All right #36, the time is now 0900 hours. For your mission this morning I want you to go back in time, back in time to 17 February 1981, 17 February. On 17 February I want you to focus on the U.S. Army Helicopter 73-21711. This helicopter has three crew members on board. I want you to focus on this helicopter at a point in time just prior to its crash....just prior to its crash. I would like you to describe what is happening from that point in time until the moment of impact.

PAUSE

+08

#36: It was mmmmm the nose of a...nose; it looks like...hue.... Mmmmmm projection. Guy in the right seat with a helmet on. Looks to the left. Guy on the left shook his head. I don't know what that means, but about that time....cyclic low frequency vibration in the stick. Quite strong...quit.... quit....stabilized. Started again. It really does shake the hell out of things, I like a....very powerful low frequency kick in the stick.

PAUSE

+10

#36: I looked for the problem and all I could see was a big disk wobbling.....turning and wobbling. I don't know whether that was the disk of the rotor blades or the disk of something else....transmitting tremendous power to this....to the stick. I feel like it's gonna shake the bird apart.

PAUSE

#36: I only see.... When I look around, I only see two guys.... somewhere up close...right....Back of the right seat..... there's something or somebody in white....to the left..... Bird is below.....clouds and mountains.

#14: We're terminating the session at this time.

PAUSE

#14: I want you to describe what took place at that time.

TARGET CUING INFORMATION

REMOTE VIEWING (RV) SESSION DCC-89

1. (S/NOFORN) At the start of this session the remote viewer was asked to go back in time to 17 February 1981. He was then asked to focus on U.S. Army helicopter 73-21711, with three crewmembers on board. The remote viewer was then asked to describe his impressions of events just prior to and at the moment of impact when the helicopter crashed.
2. (S/NOFORN) The remote viewer was given no information concerning this target prior to the start of this session.

NOT RELEASABLE TO FOREIGN NATIONALS
